***Specification***

1. The disclosure is objected to because of the following informalities:

Page 7, line 29, the docket number such as (Docket SS-709-07)  
should be deleted.

Page 7, line 20, the serial number such as (09/xxx,xxx) should be replaced  
with an actual U.S. Patent application serial number.

Page 7, line 30, the docket number such as (Docket SS-709-08)  
should be deleted.

Page 8, line 1, the serial number such as (09/xxx,xxx) should be replaced  
with an actual U.S. Patent application serial number.

Appropriate correction is required.

***Claim Objections***

2. Claims 1-7 are objected to because of the following informalities:

Claim 1, line 14, "said network" should be changed to ---said hierarchical  
network---

Claim 2, line 5, "said network" should be changed to ---said hierarchical  
network---

Claim 3, line 8, "said network" should be changed to ---said hierarchical  
network---

Claim 4, line 22, "said network" should be changed to ---said hierarchical  
network---

Art Unit: 2665

Claim 5, line 4, "said network" should be changed to ---said hierarchical  
network---

Claim 6, line 8, "said network" should be changed to ---said hierarchical  
network---

Claim 7, line 14, ---packet--- should be inserted after the word "each".

Appropriate correction is required.

***Allowable Subject Matter***

3. Claims 1-7 are objected to but would be allowable if the objections set forth above are overcome.

4. Claims 8-9 are allowed.

5. The following is an examiner's statement of reasons for allowance:

Claims 1-3 are allowable because the prior art fails to teach or suggest a method for managing the distribution of datapackets, the method comprising the steps of "managing all datapackets moving through said hierarchical network from a variable-dept queue in which each queue entry includes service-level policy bandwidth allowance for a node in said hierarchical network through which a corresponding datapacket must past; and repeatedly scanning said variable-depth queue to determined whether a datapacket should be forwarded through said node by checking

for enough bandwidth-allocation credits," in combination with other limitations, as specified in the independent claim 1.

Claims 4-6 are allowable because the prior art fails to teach or suggest a means for managing the distribution of datapackets, comprising "means for managing all datapackets moving through said hierarchical network from a variable-dept queue in which each queue entry includes service-level policy bandwidth allowance for a node in said hierarchical network through which a corresponding datapacket must past; and repeatedly scanning said variable-depth queue to determine whether a datapacket should be forwarded through said node by checking for enough bandwidth-allocation credits," in combination with other limitations, as specified in the independent claim 4.

Claims 7-9 are allowable because the prior art fails to teach or suggest a network management system comprising "a variable-depth queue comprising individual entries related to said datapackets circulating through said network, and further related to a network node through which each packet must pass; a traffic-shaping cell providing for an inspection of each one of said individual entries and for outputting a single decision whether to pass through or buffer each of said datapackets in all network nodes through which each must pass; and wherein, the traffic-shaping cell repeatedly scans said variable-depth queue to determine whether a datapacket should be forwarded through said node by checking for enough bandwidth-allocation credits, and it replenishes an account of said bandwidth-allocation credits taking into account a variable delay caused by scanning said variable-depth queue," in combination with other limitations, as specified in the independent claim 7.

Art Unit: 2665

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
